

What is an obstructive packaging?

Obstructive packaging are packaging that interfere with selective collection and/or sorting or cannot be recycled. Obstructive packaging types are identified by the Interregional Packaging Commission (IVCIE) after advice from an expert panel consisting of representatives from industry, public authorities, sorting and recycling companies. For packaging identified as obstructive, the 'strongly discouraged' Green Dot rate applies. The IVCIE may grant a temporary derogation from the application of the dissuasive tariff on the basis of a derogation file submitted by Fost Plus, listing the actions companies will take to convert these obstructive packaging types to better alternatives for sorting and recycling.

What are the obstructive packaging?

LIST 1:

- D002 laminated plastic packaging with aluminium foil for beverages
- D003 laminated cardboard packaging of chips with plastic or metal bottom or top
- D004 laminated cardboard packaging of milk powders with plastic or metal bottom or top
- D006 plastic bottles at least 70% covered by a sleeve (or 50% for bottles <50cL), provided that the sleeve is made of a different material from the bottle and is not perforated
- D007 laminated plastic packaging with aluminium foil for fruit and vegetables
- D008 laminated plastic packaging with aluminium foil for maintenance products and body care products
- D009 laminated plastic packaging with aluminium foil for prepared meals
- D010 laminated plastic packaging with aluminium foil for pet food
- D011 laminated plastic packaging with aluminium foil for wine (bag in box)

WHO IS ELIGIBLE FOR A DEROGATION?

For the list 1 of obstructive packaging entering the market in **2023** and/or **2024**, only members who indicated in the end-of-2022 survey that they intended to switch their packaging to recyclable alternatives are eligible for the tariff exemption on obstructive packaging. In this case, you will pay the Green Dot tariff for the material used in your packaging. For members who do not wish to change their obstructive packaging, the dissuasive Green Dot tariff will be applied.

No derogation has been granted for the following obstructive packaging, so that all members putting these types of packaging on the market pay the dissuasive Green Dot tariff: D001 plastic can with metal bottom or lid, and D005 oxo-degradable packaging.

Obstructive packaging on the market in 2024

LIST 2:

- D012 Colored plastic packaging with colors containing carbon black ;
- D013 Biodegradable or compostable plastic packaging;
- D014 Black glass bottles, colored in the mass;
- D015 Paper/cardboard packaging with plastic coating on all sides making the paper/cardboard fibers inaccessible (except drink cartons – category 008). The accessibility to the fibers by water can be proven by a test following 4evergreen protocol PART 1;
- D016 Laminated paper bags with aluminum inside for powdered sauces and soups;
- D017 Laminated plastic/aluminum packaging for coffee ;
- D018 Laminated plastic/aluminum packaging for cereals.

For the above categories, all members are entitled to a derogation for packaging put on the market in 2024.

Only members who have replied that they wish to switch to recyclable packaging (in the March-April 2023 survey) will still be entitled to the exemption of the dissuasive tariff for packaging put on the market in 2025. For members who do not wish to change their packaging, the dissuasive tariff will be applied for packaging put on the market in 2025.

WHO IS ELIGIBLE FOR A DEROGATION?

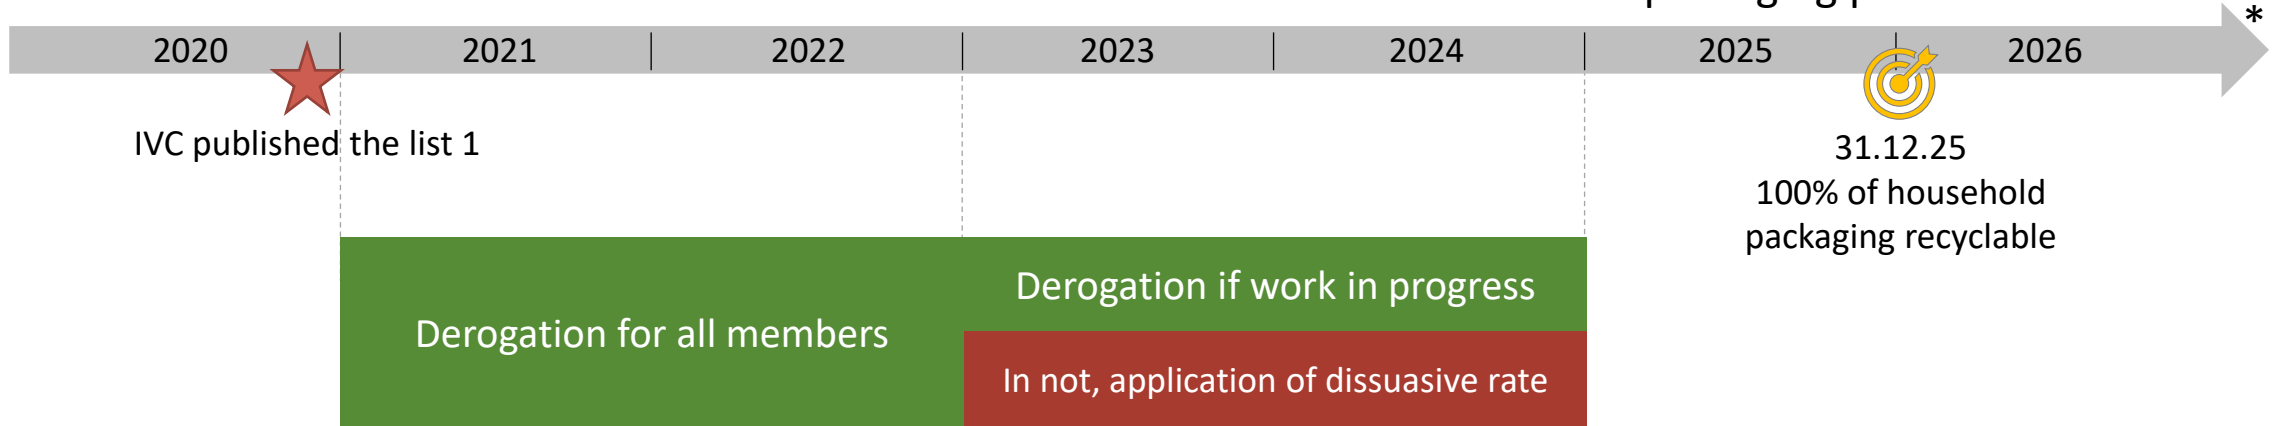

For obstructive packaging on list 2 put on the market in 2023; all members are entitled to a derogation.

For obstructive packaging on list 2 put on the market in 2024; all members are entitled to a derogation.

For obstructive packaging on list 2 put on the market in 2025; only members who responded that they wished to change their packaging to recyclable packaging (March-April 2023 survey) are entitled to the obstructive packaging Green Dot fee exemption. In this case, you will pay the Green Dot rate for the material that makes up your packaging. For members who do not wish to change their obstructive packaging, the dissuasive Green Dot tariff will be applied.

Obstructive packaging – IVC list 1

*Year when packaging placed on market *

- D002 Beverage pouch multi-material plastic/alu
- D003 Multi-material cardboard/aluminum/plastic box (for chips)
- D004 Boxes for milk powder (complexe packaging paper/plastic/aluminum)
- D006 Plastic bottle partially or fully covered with a plastic sleeve (subject to exceptions)
- D007 Pouches for fruits and vegetables (laminated packaging plastic/aluminum)
- D008 Pouches for bodily hygiene and maintenance products: only if laminated plastic/aluminum
- D009 Pouches of prepared meals (laminated packaging plastic/aluminum)
- D010 Pouches/bags for pet food (laminated packaging plastic/aluminum)
- D011 Wine bags (bag in box): only if laminated plastic/aluminum

Obstructive packaging – IVC list 2

- D012 Colored plastic packaging with colors containing **carbon black** ;
- D013 **Biodegradable or compostable** plastic packaging;
- D014 Black glass bottles, **colored in the mass**;
- D015 Paper/cardboard packaging with a **plastic coating on all sides** making the paper/cardboard fibers inaccessible (except drink cartons – category 008). The accessibility to the fibers by water can be proven by a test following 4evergreen protocol PART 1;
- D016 Paper bags laminated with aluminum inside for powdered **saucés and soups**;
- D017 Plastic/aluminum laminated packaging for **coffee**;
- D018 Plastic/aluminum laminated packaging for **cereals**.
